

R.S.M. 30 July, 2003

MEMORANDUM TO WHO OF INTEREST

PREAMBLE

the European Institute of Technology is a private, international, and independent Athenaeum for graduate education under the Authorization of the State Government of the Republic of St. Marino, born from the former State Institute of Cybernetics and set up by the person who had founded the State Institute. It was giuridically recognized by the competent Authority after the Deliberation N° 17 of San Marino's Congress of State, dated 20 - 6-1992 with a legal acknowledgement N° 345 of 27-8-1992 and under the control of the Republic of St. Marino Authority and accreditation of the Accademia Nazionale delle Scienze of St. Marino.

The E.I.T. Ateneo develops courses in Classroom and also in Distance Learning where the classroom is not required.

Its aim is to foster and promote the inter-universitary academic cooperation, twinning and the recognition of curricula. For this reason our interest in the American universities turned himself to the Honolulu University starting from 1994. With excellent relationships, in fact the past president Dr. Warren Walker, founder of the Honolulu University, our good friend, was named Member of the Accademia Nazionale delle Scienze of the Sammarinese State.

The relationships with the Honolulu University still goes on with satisfaction. We appreciate their seriousness and hope that this cooperation, as their representatives for the Italian peninsula, goes on in the time.

Best regards,
The Rector

(Prof. Dott. Aureliano Casali)
